Dear Community Partner,

The Huntington City-Township Public Library is currently planning a large-scale wrap-up event for our summer library program. Our summer theme this year is architecture so it is the perfect year to have a *community building* project.

We will be hosting our 'Can-unity: Architecture' event in which businesses, organizations, and individuals can create any building, structure, or landmark that inspires them. The catch is that everything will be built out of non-perishable food items. All of the food that is used in the construction of these projects will be donated to local food pantries.

In addition the public will be invited to vote for their favorite projects by donating food or money. All monetary donations will be given to the Friends of the Huntington City-Township Public Library and The United Way of Huntington County.

What do we need from you?

We are currently looking for businesses and organizations to fill some of our larger, high visibility spaces by donating food items and having their staff and volunteers create some awesome building projects. There are a limited number of large spaces so you will have to act fast.

What do you gain?

First of all, free publicity, you can advertise on your food sculpture in any way that you want. All sculptures will be available for public viewing at the library on July 22nd.

Second, you will have a chance to be a vital part of your community by gathering food and raising funds for some great local organizations.

If your organization would like to participate in this exciting event please contact me at rlemons@hctpl.info.

Thank you for your consideration.

Sincerely,

Rebecca Lemons
Director
